

STEEL AIR HOSE

Recommended Use:

Designed for compressed air and water applications in the most severe environments. Used in mining, quarries, industrial and construction where long service life and safety is required.

Features:

- Steel braid construction for high pressure.
- Good resistance to abrasion and UV.
- Working temperature range of -30°C to +80°C.
- 40 Bar Working pressure with 4:1 safety factor.

Construction:

- INNER TUBE:** Black NBR – Oil mist resistant.
REINFORCEMENT: High tensile steel cord.
COVER: Yellow SBR/NBR – abrasion, ozone, hydrocarbon resistant – pin pricked.
